Profile

Transdisciplinary professional, holds a BDes degree in Visual Communications and has been developing web and web based applications for over a decade. Passionate about translating visual concepts and interfaces into satisfying interactive experiences. Possesses sound knowledge in cross-browser and cross-platform development, both client side and server side rendered, leveraging from dynamic templating, single page application frameworks or the “old school” duo HTML/CSS.

What’s in the horizon

I am currently in love with **P-focused development**: personal, professional, products and people. (cheesy, yeah) During my career I grew up, out and about as a designer and as a developer. I’ve done things and seen things, now I want to make things, build experiences and relationships, using innovative and humane technology for the betterment of all living beings. I am working towards becoming a more polished developer and be able to serve as a beacon of knowledge and support to my peers.

“No community is easier to govern than one that rejects the very concept of community.”

— Stephen King, The Dark Tower

Summary of Qualifications

What’s trending

- JavaScript
- React
- React Native
- Node.js
- Jest
- Testing Framework
- CSS Modules
- PostCSS
- ECMA6+ features
- StandardJS
- Babel
- webpack

Topics of interest

- WebStandards
- Accessibility
- Usability
- Internationalization
- Git versioning
- CI / CD
- Static code analysis
- Unit testing
- Prototyping
- UI development
- Documentation
- Refactoring

Career highlights

Globant

Sep 2020 - Present

UI Developer

Supported a development team in building a mobile application for Janssen - Johnson & Johnson's pharmaceutical company - using React Native through an Expo managed workflow, during its MVP stage. Most recently supported DirecTV GO's streaming application development for smart TVs running WebOS and Tizen operational systems, leveraging from React ecosystem as well.

Banco Bmg

Jun 2020 - Apr 2021

HTML E-mail Developer

Successfully updated Bmg's e-mail communication with its clients, implementing the bank's rebranded identity into a carefully developed structure, favoring the use of textual content in place of image dependant messages, and built to reach large audiences, supporting Outlook based e-mail clients among many others.

luizalabs

Nov 2018 — Nov 2019

Front-end Developer

Lead front-end developer in Quero de Casamento, Magazine Luiza's online wedding registry platform. Worked closely with back-end developers and UX designers, building coherent responsive interfaces; Interacted with other developers, via pair programming, code reviewing and other projects.

Kicked-off a responsive server side rendered React based solution, to gradually replace the desktop and mobile client side bundles and eliminate the need for a prerender instance. Maintained both legacy React code as well as more up to date codebases, using React's latest features.

Soft skills

Adaptability

- Critical thinking
- Open mindedness
- Quick learning
- Risk identification

Working together

- Respect
- Collaboration
- Humaneness
- Knowledge transfer

Needs improvement

- Focus
- Confidence
- Time management
